Skills

Languages: Java, Python, JavaScript, SQL, HTML5

FrameWork/ Tools: R, NumPy, Microsoft Azure, Unit Testing, PyTorch, Next.js, Vercel, Git, CSS

Education

University of Toronto

B.S. in Computer Science and Cognitive Science; Minor in Mathematics

Sept 2023 – May 2028

Experience

Machine Learning Research Intern

Hong Kong

Huawei Technologies – Leibniz Research Center, Optimization and Control Theory

Jul 2026 – Jan 2027

- Developed machine learning and reinforcement learning solutions for wireless network optimization.
- Built end-to-end Python pipelines for data processing, model training, validation, and experimental analysis.
- Benchmarked proposed methods against baselines, reducing unnecessary network switching by 81.3%.

AI Developer Intern

California, US

LeadDigital

May 2026 – Jul 2026

- Developed an AI-based workflow to analyze technical ship blueprints and convert engineering drawings into structured outputs.
- Built data preprocessing and evaluation workflows and analyzed model errors to improve output reliability.

Full-Stack Research Assistant

California, US

Stanford University – Human-Computer Interaction in Artificial Intelligence

May 2025 – Sept 2025

- Implemented and evaluated models in Python for social-media depression detection.
- Built data preprocessing, feature engineering, model training, and performance evaluation workflows.

Software Developer

Toronto, Canada

University of Toronto

Sept 2025 – Apr 2026

- Developed machine learning and relational database features for APLUS, an academic platform used by more than 1,000 students.
- Optimized data-processing workflows to improve performance by 30% and built ML pipelines and frontend components for Balance AI.

IT Officer

Vancouver, Canada

Department of National Defence

Feb 2025 – May 2026

- Maintained web systems supporting more than 200 people and debugged day-to-day application issues.
- Automated operational workflows using Microsoft Azure, reducing processing time by 30%.

Projects

Paper Reference System

github.com/Paper-Reference-System [↗](#)

- Built academic writing tool with article summarization and semantic search using Python, reducing literature review time.

Airline Planning System (Python)

github.com/airline-RS [↗](#)

- Implemented flight planner with real Google Flights data, enabling custom itineraries and optimized search with Pandas/NumPy.

Hearing Disability Assitant

github.com/HOI [↗](#)

- Designed Arduino-based wearable that detects critical sounds (alarms, knocks) and logs alerts to a companion web app.
